Overview

The TruVision DVR 44HD (TVR 44HD) is a digital video recorder with 8 or 16-channel capabilities. The DVR 44HD utilizes TVI high definition technology to deliver mega pixel quality over standard coax cable. The TVR 44HD is a true hybrid design and can support any combination of standard analog, analog HD-TV or IP cameras.

The installation manual has been updated please refer to this for detailed explanations of features.

Summary of new features and key enhancements

- Support connection to IP Camera via the ONVIF protocol
- Support for the new line of TruVision Series 3 IP cameras that will be launched later in 2016. It only supports up to 2 MPX for this camera range.
- Support for diagonal movement of a PTZ dome camera connected to the TVR 44HD (in combination with TVK-800 FW1.2)

- Security feature. The device will lock out users for 1 minute after 5 illegal login attempts.
- QR code support on the On Screen Display (OSD) for TVRMobile
- Support for push notifications to TVRMobile
- Supports Copy IP camera settings
- The browser can now support custom views for live viewing
- On playback, cameras that are not online are greyed out
- Supports local output configuration via browser, display settings and layout
- The layout of the V-stream can be set up on the web page.
- Security enhancements

Summary of defects fixed

- Unable to set Preset tour duration field value other than 0(zero)
- Incorrect channels in Alarms and Video Loss are displayed in Health Diagnostics, Device Report
- VCA alarm notification issues in TruVision Navigator
- VCA notifications are not reporting when motion detection is configured
- In the browser IP camera names are not displayed in playback
- VCA configuration options not available in the web browser
